

Embracing the future in cabin crew training

Angela Gallorini

Operational Suitability Data Expert, Cabin Crew Training, EASA

6 November 2024, EATS 2024 Cabin Crew Conference

Your safety is our mission.

A group of eleven young men and women, representing a new generation of cabin crew, are posed in two rows. They are wearing professional uniforms: the men in dark blue suits with ties, and the women in grey or blue blazers over white collared shirts. Some women are also wearing dark blue pilot-style caps. They are all smiling at the camera. The background is a blurred airport terminal with a large airplane visible in the upper right.

Training New Generations of Cabin Crew

A group of pilots in a simulator wearing VR headsets and life vests. The pilots are in a line, facing forward, wearing white VR headsets and red life vests over dark blue uniforms. They are in a simulated cockpit environment with overhead lights and control panels visible in the background.

Novel Technologies in Training

Not on my flight: Zero tolerance against unruly passengers

An Agency of the European Union 

A photograph of an airplane cabin interior. A female flight attendant in a white uniform and grey vest is standing and gesturing with her hands towards a male passenger. The passenger is seated, looking back at her with a concerned expression. Other passengers are visible in the background, some looking towards the interaction. The scene is overlaid with a semi-transparent blue banner containing the title text.

Managing Disruptive Passengers
